FOREWORD

The Directorate General of Mineral and Coal of the Ministry of Energy and Mineral Resources is pleased to present its annual publication, the Statistics of Mineral and Coal 2011. This publication is intended to provide sound information on mineral and coal industries for those who interested on it. This Statistics consist of production, export and domestic sales of mineral and coal data of 2011, the latest status of enterprise, investment, master list, state revenue, manpower and community development.

The source of the compilation was input from Contracts of Work (COW), Coal Contracts of Work (CCOW), some Mining Business License holders for mineral and coal and also geological agency for the mineral and coal field research result inventories; meanwhile, additional data and information of the Mining Business License holders up to mining production were requested from regional government (provinces and regencies).

During the course of preparing this Statistics, we found out that most of the data and information provided by the contributors still need to be improved in terms of accuracy, reliability of the collection, quality of their administrative statistics, and timing. We wish the relationship between the contributors and our institution for this publication will be increased in the future. We hope this publication will valuable to all users in particularly stakeholders in the energy and mineral resources sector, for the business purposes, decision or policy making process, research, etc.

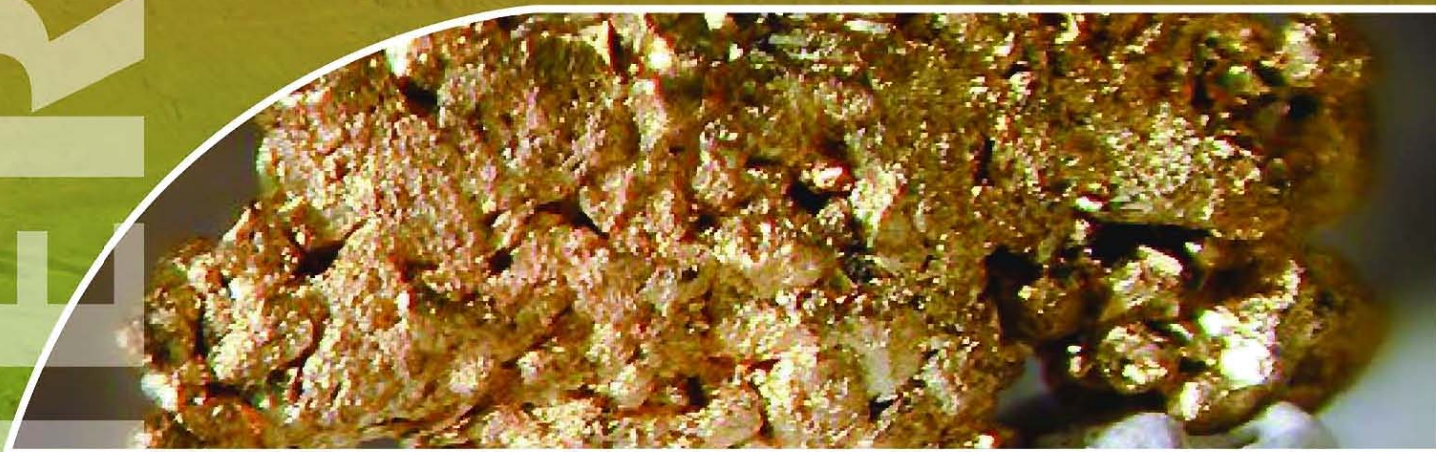

I would like to take this opportunity to extend profound gratitude to all those who have given their valuable contribution an support to this publication.

Regards

Note :

Decreasing of Government Revenue was due to the following reasons:

- Due to the promulgating of Government Ordinance No. 144 of 2000 regarding Value Added Tax (VAT)
- A difference of an exchange rate from IDR to US\$; in 2003 the exchange rate was Rp. 9.000 for US\$ 1, in 2008 was Rp. 9.100 for US\$ 1 and in 2009 was Rp. 10.500 for US\$ 1.
